REFINISH SYSTEM

TRANSTAR[®]

AUTOBODY TECHNOLOGIES, INC.

Transtar's No Mix, Low VOC Refinish System is a solvent-based, 3-in-1 solution that gives you the ability to meet the quality and economic needs of each and every job with a high-solids, medium-solids and single stage urethane offering. With significant and continuous investments in color match, we pledge you will be satisfied with the results of every finished project. We offer the color matching tools you've come to expect from the highest-quality refinish providers such as a variant deck, tint characteristics booklet and online formula retrieval. You will find an extensive color palette including solid, metallic, pearl and xirallic toners that allows you to create over 175,000 high-solids and medium-solids color formulations and 70,000 single stage color formulations.

The unique composition of No Mix eliminates the need for a costly mixing bank and minimizes the chance of toner separation. Just shake and pour! Its excellent color depth translates into better coverage and reduced cycle times! Utilizing the latest in pigment and resin technologies, No Mix Low VOC provides superior pigment distribution and flake control.

Transtar is dedicated to helping you grow.

Transtar's sales and technical representatives are located throughout the country to assist you in person. And our products are backed with a warranty so you can feel confident knowing Transtar is there to support all of your needs and help you grow your business.

For optimum results, select from Transtar's complete line of high performing prep products, primers, clearcoats and finishing products for use with our No Mix Low VOC Refinish System.

Major Advantages of the No Mix Low VOC Refinish System

- **3-in-1 solution (High-Solids, Medium-Solids, and Single Stage)**
- **Complete color matching tools**
- **Superior pigment distribution that minimizes mottling**
- **175,000 high-solids and medium-solids color formulations and 70,000 single stage color formulations**
- **Excellent color depth which provides better coverage and reduced cycle times**
- **Nation-wide sales and technical representatives**
