

The Most Efficient Paint System on the Market!

4 Options With 1 System - High Solids, Medium Solids, Single Stage & Custom Aerosol

Custom Aerosol Paint

You don't own any spray equipment? Look no further, No Mix is available in a custom blended aerosol. Tell us what color you need, or bring in a sample, and your Transtar Jobber will make your color and package it in our specialized spray can. Call ahead, or have it mixed while you wait. It is fast and easy!

High Solids Basecoat

No Mix High Solids Basecoat is the perfect option for anyone concerned with offering the highest-quality results that meet the nation's most stringent VOC regulations. It offers excellent coverage in as little as 2 coats with superior metallic control.

Single Stage Basecoat

No Mix Single Stage Urethane has superior metallic control, requires less effort in the booth, and has excellent vertical hang. Flow and leveling are easy to achieve, and the appearance is enhanced by its outstanding gloss. Single Stage has over 70,000 color formulations available in solid, metallic and pearl. This is a great choice if you paint light commercial vehicles, fleets such as taxi cabs and rental cars, municipal vehicles, trailers and more!

Medium Solids Basecoat

No Mix System Medium Solids is an innovative color system that allows you to mix a medium solids version of every available color formula to help you reduce material costs. The medium solids basecoat provides good coverage, blends easily, has great metallic control and has excellent overall performance.
